

FedEx® Global Trade Manager: One-stop source for global shipping assistance for XYZ association members

Whether you're an experienced global shipper or in the initial stages of international trade, FedEx can help you speed shipments to their international destinations with FedEx Global Trade Manager, your comprehensive resource for simplifying international shipping.

Documentation and Resources

The right documentation can make all the difference in international shipping. The "Find International Documents" feature lets you locate and print the proper import and export documentation, based on shipment and commodity information, to increase the likelihood of smooth customs clearance.

You can also check out the International Resource Center. This service helps take the guesswork out of complying with the laws and regulations governing international shipping by providing a comprehensive array of tools, documentation and information related to international trade. You can find more than 600 international shipping and customs forms in the Document Library, use FedEx International Document Assistance® to complete the seven most commonly used U.S. export forms online, and view Country Profiles for information on more than 20 countries.

Estimate Fees and Store Information

The "Estimate Duties and Taxes" feature lets you enter shipment-specific information and calculate the estimated duties, taxes and other fees that may be levied against your international shipment, all for a small fee. This feature can help you reduce costly returns, maintain competitive prices, check quotes from overseas suppliers and more.

"My Information" lets you edit your contact information and store details about the products that you ship. Then you can re-use information on often-imported commodities, so you save time and reduce the chance of re-keying errors.
